

Saturday,
Apr. 29, 2017
7 a.m. – 11 a.m.

Rotary Club of Canton Semi-Annual

Health Screen & Wellness Fair!

Mercy Hall Auditorium, 1320 Mercy Drive NW, Canton, Ohio 44708

Basic Panel of Tests*: **\$40**

Basic Panel of screenings (CBC, CMP, lipid profile and Thyroid (TSH)) gives over 30 different results.

Testing for: cholesterol • anemia • kidney/liver function

OPTIONAL TESTS

A1C HEMOGLOBIN	\$15
PSA	\$15
VITAMIN D 25-Hydroxy	\$48

All testing will be provided by **Mercy Medical Center Laboratory Services**. To register in advance for these screenings, call the Canton Rotary at **330-452-2882** (Monday, Tuesday & Thursday between 8am – 4pm). To conveniently register online, visit cantonrotary.org. Canton Rotary accepts cash, check and credit card (VISA and MASTERCARD).

In addition to the blood screenings, Mercy Medical Center service lines will be offering additional **FREE** health screenings and educational materials.

Walk-in appointments are also welcome.

* A 12-hour fast is recommended for more accurate results.

WHY GET TESTED?

Basic Panel of Tests (\$40.00)

- **CBC** – To determine your general health status; to screen for, diagnose, or monitor any one of a variety of diseases and conditions that affect blood cells, such as anemia, infection, inflammation, bleeding disorder or cancer.
- **CMP** – To give your health care provider important information about the current status of your kidneys and liver as well as electrolyte and acid/base balance and levels of blood glucose and blood proteins; to monitor known conditions, such as hypertension, and to monitor the use of medications to check for any kidney- or liver-related side effects (A 12-hr fast is recommended for most accurate results.)
- **Lipid Profile** (Includes: Total Cholesterol, Triglycerides, HDL, LDL) – To assess your risk of developing cardiovascular disease (CVD); to monitor treatment; to assess the risk of developing heart disease.

Screening: for adults, every five years; for youths, once between the ages of 9 and 11 and again between ages 17 and 21 (A 12-hr fast is recommended for most accurate results.)

- **Thyroid** – To screen for and help diagnose thyroid disorders; to monitor treatment of hypothyroidism and hyperthyroidism.

Optional Tests:

- **A1C Hemoglobin (\$15.00)** – To monitor a person's diabetes and to aid in treatment decisions; to diagnose diabetes; to help identify those at an increased risk of developing diabetes.
- **PSA (\$15.00)** – To screen men for prostate cancer (although there is currently no consensus about using this test to screen asymptomatic men for prostate cancer), to help determine the necessity for a biopsy of the prostate, to monitor the effectiveness of treatment for prostate cancer, and to detect recurrence of prostate cancer.
- **Vitamin D 25-Hydroxy (\$48.00)** – To determine if you have a vitamin D deficiency; if you are receiving vitamin D supplementation, to determine if it is adequate.
